

FLOOR PLAN

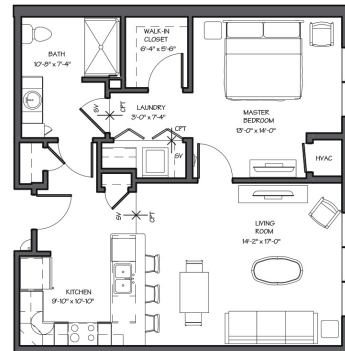

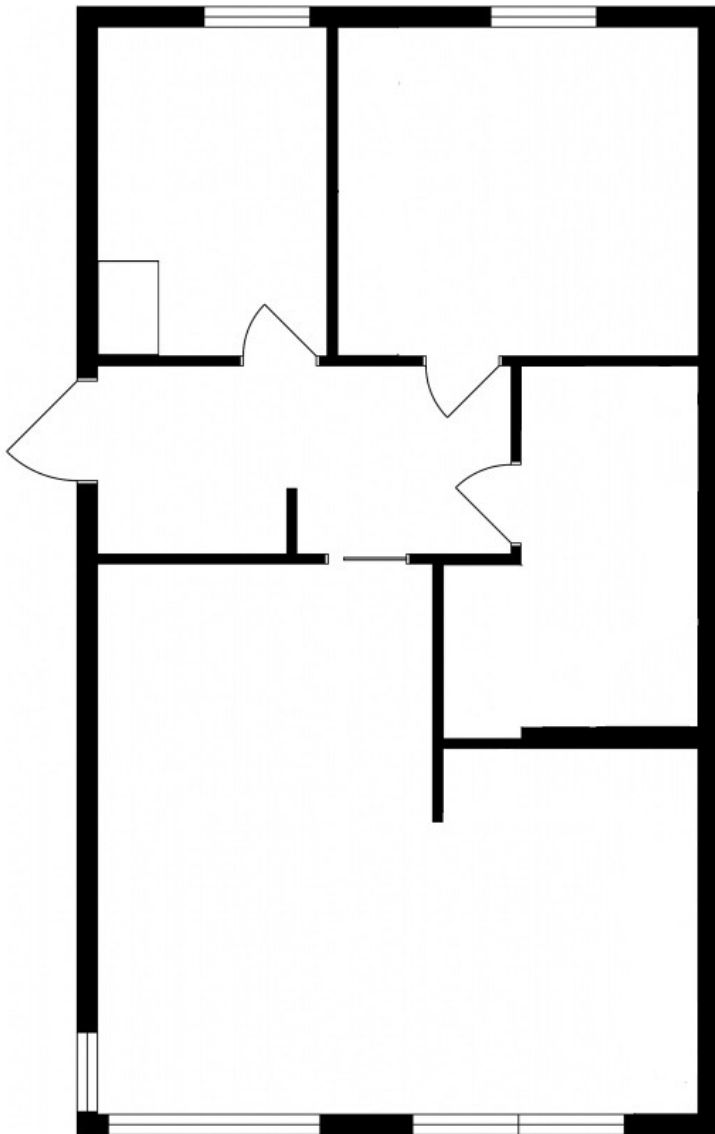

TASK

This is what a house or apartment floor plan might look like. We use basic shapes - squares, rectangles, ovals, etc. - to show where furniture, bathroom fixtures, and kitchen appliances might go.

Using the blank plan below, design your dream apartment.

If you don't have a printer: sketch your own plan and fill it in!

Bonus: you can add as many other rooms as you want!

THOUGHT STARTERS:

- How many people live in your house?
- Where will everyone sleep?
- Where will you hang out?
- Where will you cook?
- Where will you do homework?
- Is there enough storage space for clothes, dishes, toys, etc.?
