

MOOD BOARD

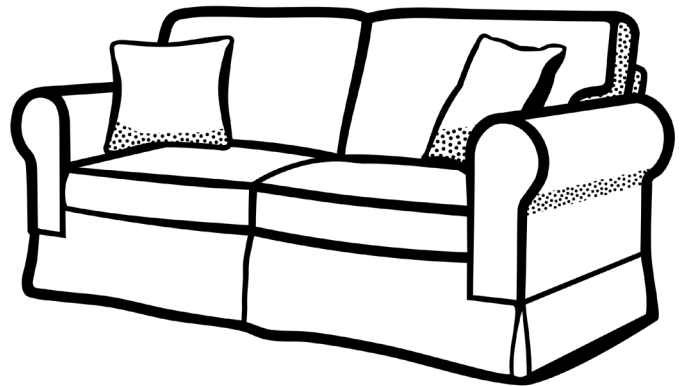

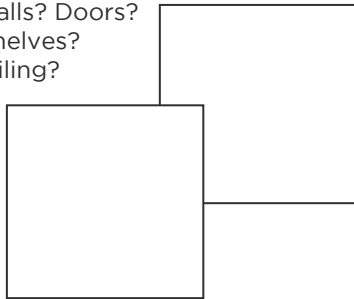

TASK

A mood board is a tool interior designers use to show how all the different elements in a room will look together. Paint, furniture, fabrics, fixtures, flooring and more all need to work together to create the kind of feelings a client wants. Fun and colorful? Relaxing and serene? Dark and moody? The interior finishes are an important part of telling a story with a building's design.

Design a mood board for your house by either coloring on this page OR designing your own on a sheet of paper. Play with color, pattern and different kinds of materials to create the kind of mood you would want in YOUR house!

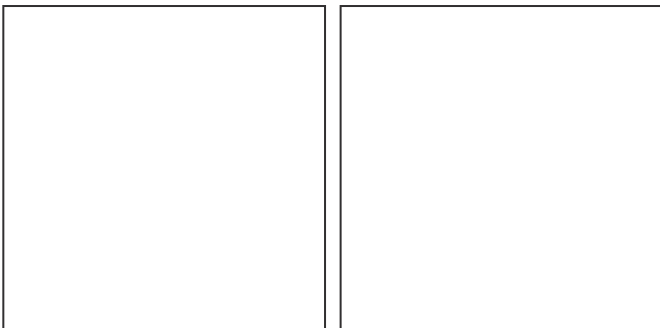

Paint Colors

Add more if you'd like! Where will these paint colors go? Walls? Doors? Bookshelves? The ceiling?

Flooring

Will you choose carpet, tile, wood? Do you like patterns or solid colors?

Other Furnishings & Accessories

What other furniture do you want in your room? Chairs? Tables? Bookshelves? What kinds of accessories will help make your room feel fun or cozy? Lamps? Plants?

Fabrics

What fabric will you choose for your sofa? Curtains? Where else might you use fabric in a living room?

Art

What kind of art might you add to your space?
A painting?
A sculpture?
A mobile?
