

TIN FOIL BOATS

TASK

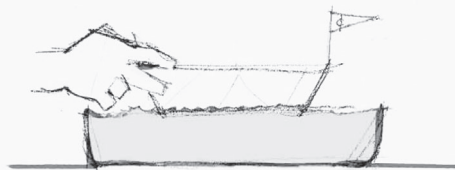

Design a tin foil boat to see how much weight it can hold.

WHAT YOU'LL NEED

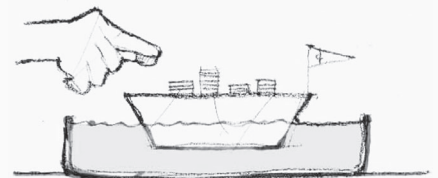

1

Fold the sheet of aluminum foil into a boat; any shape that floats!

2

Put the boat in the water and begin to add pennies one at a time.

3

Count the pennies that are put into the boat until the boat cannot stay afloat.

Be Careful! Dropping the pennies into the boat could make a leak.
